

Idea: Devhub hosts remote repositories

Task 1: I want to get my app into the Marketplace

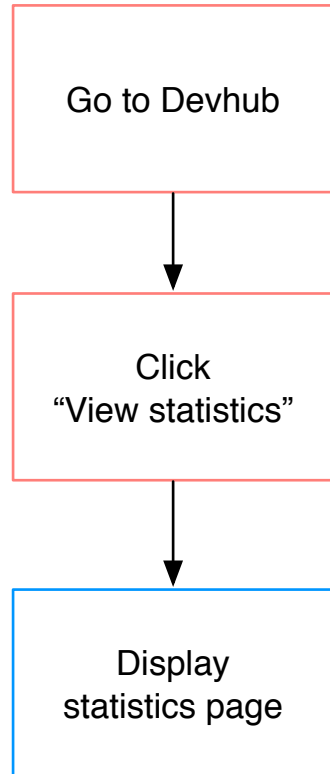

Task 2: I want to update the description of my app

Key

-  Performed by developer
-  Performed by system

Task 3: I want to see how many times this app has been installed

Key

-  Performed by developer
-  Performed by system

Task 4: I want to publish a new version of my app

Key

Performed by developer

Performed by system

Performed by reviewers
